

CASUAL BY BENE

MANY WAYS TO MEET

Offices are increasingly becoming places of interaction and teamwork. People, ideas and projects come together here. Spontaneous exchange, which is essential for creative approaches and relationships, calls for a certain kind of space and Informal and hybrid places are becoming increasingly important.

Flexibility, modularity and versatility are needed in office design to provide the right space for every task. Functional and comfortable seating creates an environment for this unifying togetherness – at ease, relaxed, CASUAL.

Design: Christian Horner

Various leather collections: Entrée, Entrée Color, Superior.

More information about the specific fabric and leather collections is available at www.bene.com.

THE BENE RESPONSIBILITY

Bene plays a pioneering role in the field of sustainability. This spans all company divisions – from product development, procurement, production, and logistics to product recycling. From the first sketch through to series production, ecological requirements are always an important factor in the product development process. It includes selecting environmentally compatible materials, such as certified timbers from sustainably managed forests, using recycled materials and increasing the use of renewable raw materials. Other important requirements for a sustainable product design are labelling the materials, their ability to be repaired, and a long service life for the components used, with the aim to integrate them into a second product life cycle.

To guarantee a high recyclability standard for our products at the end of their service life, we avoid composites as much as possible and develop furniture that allows for disassembly by material type. Bene products are sourced and made in Europe. 99.9% of all deliveries reach us from a European country. Around 94% of all raw material supplies come from Austria and Germany. Around 93% of the raw materials comes from suppliers within 500 kilometres of our production site.

SUSTAINABLE RAW-MATERIALS

At Bene, the following materials are used as a matter of course:

- chipboards low in formaldehyde
- glues low in formaldehyde
- water-based varnish systems
- recyclable materials
- materials with a high recycling share
- PVC-free synthetics

Bene guarantees products free from:

- CMR substances
- halogenated solvents in synthetics
- chlorinated hydrocarbons
- heavy metal pigments
- materials with azo pigments
- Coatings with biocidal effects (such as wood preservatives, pesticides).

CONTRIBUTION TO BUILDING CERTIFICATIONS

In the context of ecological building certification, design systems such as furniture and dividing walls help to achieve a good result and a higher score.

Bene's products make a contribution towards the LEED, Well Building Standard, DGNB, BREEAM, etc. certifications. Criteria include, for example, environmental product declarations, indoor air quality, acoustics and convertibility.

CASUAL

Example configuration

- Double Bench High
- with backrest
- with armrests
- total weight 26,41 kg

Environmental key figures

- 97,5 % sortable by type
- 81,7 % recyclable
- 29,1 % of contents are renewable raw materials
- 26,14 % recycled production materials

Materials

synthetic material
4,18 kg / 15,82 %

fabrics
0,67 kg / 2,53 %

wood
7,69 kg / 29,11 %

steel
13,87 kg / 52,54 %

On request, Environmental Product Declarations (EPD, LCA) – at Bene we call them Life Cycle Data Sheets – can be provided for all standard product configurations.

A list of product-specific certificates and design awards can be found on the Bene product website.
