

T-meeting.

T-meeting tables are concisely in design and conform perfectly to the image of the whole Workstation. Reduced in the style and high functional with all intelligent characteristics of a modern meeting table programme. Configurations from an individual desk up to great combinations are practicable. A high value was set on a first-class, innovative media integration. T-meeting is a technically matured and sophisticated product, which guarantees our customers the familiar Bene quality.

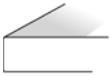

These programmes offer a wide range of colours, dimensions, heights and a homogeneous colour and material concept. Because of a functional and systemic integrated conception, identity building and spatial overall stagings are possible. This functional and aesthetic value is appreciated by the customer. The products are emotionally attractive - in the close-up range of the employee as well as in the spatial creation of the living space office.

FACTS

- Maximum of individualisation options for working and meeting tables, depending on a variety of frame types, top functions and top shapes.
- Homogeneity with the design of Workstation.
- Different comfort grades at the cable management due to different top functions (sliding desk top and cable flap)
- Cable flaps are flush with the desk surface and allow an ergonomically correct and quick access to connection plug board and cable tray.
- Complete media integration possible.
